

BRIEF DESCRIPTION OF THE DRAWINGS

The accompanying color drawings illustrate the overall appearance of the new *Euphorbia* cultivar 'TASMANIAN TIGER' showing the colors as true as it is reasonably possible to obtain in colored reproductions of this type. Colors in the photograph may differ from the color values cited in the detailed botanical description, which accurately describe the actual colors of the new variety 'TASMANIAN TIGER'. The drawing on sheet 1 illustrates the entire plant in bloom from a side perspective. The drawing on sheet 2 illustrates a close-up view of the inflorescence. Both drawings were made using conventional techniques and although flower and foliage colors may appear different from actual colors due to light reflectance, they are as accurate as possible by conventional photography.

BOTANICAL DESCRIPTION OF THE PLANT

The following is a detailed botanical description of the new *Euphorbia* cultivar 'TASMANIAN TIGER'. Observations, measurements, values and comparisons were collected in Arroyo Grande, California from 2-litre container plants that were 18-months-old and grown out-of-doors in full sun. Color determinations are made in accordance with the 2001 Royal Horticultural Society Colour Chart from London England, except where general color terms of ordinary dictionary significance are used. The growing requirements of the new variety are similar to the species and there are no known growing problems, diseases or pests.

Botanical classification: *Euphorbia* 'TASMANIAN TIGER'.

Species: *characias*.

Common name: Spurge.

Commercial classification: Shrub.
